PROFESSIONAL SUMMARY

Full Stack Web Developer with 3+ years of experience architecting and building scalable web and mobile applications. Proven expertise in Angular, React, Next.js, .NET Core, Node.js, and Flutter. Experienced in designing enterprise EHS platforms, double-entry financial ledger systems, and high-throughput RESTful APIs.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Dart, HTML5, CSS3, SQL

Frontend: Angular, React.js, Next.js, Flutter, TailwindCSS, Responsive Design, Component Architecture

Backend: Node.js, Express.js, ASP.NET Core, .NET, EF Core, RESTful APIs, Blnk Ledger, Redis, RabbitMQ

Databases: PostgreSQL, SQL Server, MySQL

Tools & DevOps: Git, GitHub, Visual Studio, Postman, Docker, IIS, Agile

PROFESSIONAL EXPERIENCE

Full Stack Developer (.NET · Next.js · Flutter)

Jul 2026 – Present

Mobibox — YallaPay E-Wallet

Fintech / Digital Wallet Platform

- Built a dynamic Role-Based Access Control (RBAC) system end-to-end — granular per-action permissions (view/create/edit/delete), role-driven admin sidebar, permission hooks, and Redis-backed caching with cache invalidation.
- Led the wallet decoupling effort, adding OwnerType/OwnerId to the wallet model so both end-users and merchants share one wallet abstraction, with null-safe ledger owner resolution and auto wallet creation for marketplace merchants.
- Implemented QR-verified account statements: server-side bank-format PDF generation (QuestPDF), a backend data API consumed by the Flutter app, a public verification portal, and embedded logo + QR watermarking.
- Delivered profession-based wallet limits with a maker-checker dual-approval workflow, plus configurable balance-limit banners driven by AppConfig across web and mobile.
- Hardened financial safety across the platform — remediated 59+ audit findings covering null-reference crashes, silent SQL failures, duplicate prevention, and refund/credit rollback guarantees.

Full Stack Developer

Aug 2023 – Jun 2026

SETU NET Pvt Ltd

Vapi, Gujarat

- Developed and maintained multiple EHS (Environment, Health & Safety) web applications for enterprise clients including Pidilite, Coca-Cola, HACCPBL, and Galaxy, delivering end-to-end features across frontend, backend, and deployment on IIS servers.
- Built configurable dashboards and reporting systems with drag-and-drop layouts, custom charts, and shared dashboards used across cross-functional teams.
- Implemented authentication and security integrations including SSO and OAuth, ensuring secure enterprise-level access, and integrated third-party APIs for automated data synchronization workflows.
- Collaborated closely with QA, product teams, and enterprise clients to resolve production issues, iterate on features, and deliver production-ready releases on schedule.

KEY PROJECTS

Dynamic Report Tool | *Angular, Node.js, PostgreSQL* [\[Live View\]](#)

May 2025 – Dec 2025

- Developed a self-service reporting and dashboard platform enabling users to create custom reports and charts with drag-and-drop dashboard configuration, real-time filtering, grouping, multi-level drill-down, and export (PDF, Excel, CSV).
- Designed reusable chart and report components with configurable metadata, reducing developer dependency and enabling faster feature delivery.
- Optimized SQL queries and backend API responses to support concurrent users with consistent sub-second performance.

Task & Project Management System (Freelance) | *React.js, .NET, SQL Server*

Sep 2025 – Dec 2025

- Designed and developed a custom project and task management system for an architecture company to manage ongoing projects efficiently with task tracking, status updates, deadlines, and team assignments.
- Built modules for site visit scheduling and documentation, improving coordination between office and on-site teams.
- Developed MOM (Minutes of Meeting) management to record discussions, action items, and follow-ups for each project.

- Created role-based access and dashboards to provide clear visibility of project progress and responsibilities.

EDUCATION

Bachelor of Science in Computer Science

Savitribai Phule Pune University

June 2020 – June 2023

GPA: 8.13/10
